

Tsune Seiki Japan established Tsune Europa in Germany

With our new European subsidiary Tsune Europa GmbH located in Germany we are able to serve our European customers through a centralized organisation. Our facility is situated in Aachen where we keep a large assortment of saw blades, circular cutting machines and spare parts on stock.

Our cutting machine range contains circular cutting technology from 10 - 260 mm capacity and saw blades for cutting steel and

aluminium in different shapes and for solid and hollow sections. To serve the different needs of industrial fields we additionally

offer various kinds of magazines and units for handling parts.

Reliability, highest precision and innovative cutting features characterize our circular cutting technology.

Our own R & D department and service engineers support us to fulfil the needs of our customers.

In cooperation with our European resellers we are able to offer you an efficient and professional service throughout Europe.

Your goal: Only one supplier for machines and saw blades: The

most effective solution for your cutting job due to our Know-How.

We welcome you at our booth hall 18, B 28 to experience the performance of our CNC circular saws. You will be able to see our machine type TK5C-160GL for steel applications up to 160 mm.
